EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims (based on the clean version of the claims received on 3/28/2007):

Claim 1:

- In line 4, replaced "comprising," with --comprising--
- In line 7, replaced "comprises," with --comprises--
- In line 15, replaced "comprising:" with --comprising--
- In line 23, replaced "to," with --to--
- In line 26, replaced "winding" with --winding.--

The changes listed above do not affect the scope of the claim and are meant to correct punctuation problems. Applicant is advised that the punctuation should be such that if written in a continuous paragraph (i.e. without the indented structure), the claims should "flow" when read. As amended by Applicant, "a support element comprising, a frame having an axis ..." clearly was not in a proper form, and the comma was therefore removed. Similar changes were made to subsequent lines, as listed.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach, in combination with all other claim limitations, the particular control

element comprising a cone disposed coaxial to the frame and having a surface inclined relative to the axis of the frame, the control element being configured to axially move the cone in the frame such that the ends of control arms of a plurality of levers are maintained in support against the inclined surface of the cone such that the levers pivot in response to the axial movement of the cone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
